Women will get breast cancer in her lifetime.

Learn your options.

Learn the facts about getting checked for breast cancer

Breast cancer has one of the highest survival rates out of all of the cancers in Ontario.

Regular screening is important because it can find cancer early when it may be smaller and easier to treat.

Talk to your family doctor or nurse practitioner about screening

The Ontario Breast Screening Program provides high-quality breast screening throughout Ontario to eligible women.

No screening test is perfect. Have a conversation with your family doctor or nurse practitioner about your breast health.

Visit cancercareontario.ca/bcam to find your **closest clinic** and for more information about the Ontario Breast Screening Program. Alternatively, to book your mammogram call **1.800.668.9304**. No referral from a doctor is required.
