# Moderna Spikevax COVID-19 mRNA Vaccine for COVID-19 Immunization - Medical Directive

## Medical Advisory Committee Approved: 13JAN2022

☑ Harmonized

## Authorizing Prescriber(s)

Lakeridge Health (LH) Physician(s), for admitted patients, the COVID Immunization Clinic (CIC), and Occupational Health, Safety and Healthy Workplace Department (herein after referred to as Occupational Health (OH)) at LH.

## Authorized to Whom

All Regulated Health Care Providers (RHCP) and Unregulated Care Providers (UCPs) working at LH on an inpatient unit, in the CIC and or in OH with the knowledge, skill, judgment and training to administer intra muscular (IM) treatments following successful completion of a competency evaluation.

All Regulated Health Care Providers working at LH on an inpatient unit, with the knowledge, skill, judgement and training to enter an order for the vaccine in the computer information system (CIS).

## Patient Description/Population

Any LH admitted patient, patient in the CIC, or Lakeridge Health Colleague (LHC), 30 years of age and older, who requires a Moderna COVID-19 mRNA vaccine.

**Note:** Moderna is authorized for use in adults 18 - 29, however should ***only*** be administered if the patient refuses Pfizer, as the preferred vaccine for this population, and with informed consent.
LHCs include:

- employees,
- privileged staff (physicians, dentists, midwives),
- volunteers,
- board members
- contract workers, and
- students

## Order and/or Procedure

These procedures are not presented in sequential order; any one of or combination of these procedures below may be performed by an authorized RHCP/UCP.

**For patients of the CIC or LHC:**

1. Confirm patient's/LHC's identification using 2 patient identifiers (e.g., Ontario Health Card and date of birth).
2. Complete the pre-screening assessment and documentation in COVAX, including assessment of allergies, present health and current medications.
3. Ensure there are no contraindications to patient receiving the COVID-19 mRNA vaccine.
4. Obtain consent and document consent in COVAX.
5. Administer vaccine:
   **First and second dose**: administer Moderna Spikevax 100 mcg (0.5 mL) IM (deltoid)
   **Third and subsequent dose(s):**
   - Patients/LHC 30 years of age to 69 years of age or those 18 years of age to 30 years of age that prefer Moderna and who are **NOT** identified as moderately or severely immune compromised give, Moderna Spikevax 50mcg (0.25ml) IM (deltoid)
   - Patients/LHC 70 years of age (turning 70 years of age this calendar year) and older OR patients 30 to 69 years of age or those 18 years of age to 30 years of age that prefer Moderna, identified as moderately to severely immune compromised according to MOH guidelines give: Moderna Spikevax 100mcg (0.5ml) IM (deltoid)
6. Post Vaccine Recovery: Advise patient/LHC to remain in the vicinity post injection for observation and advise patient/LHC to notify staff of any significant side effects, new symptoms or changes to existing symptoms during this time:
   **First and second dose:**
   - Patients/LHC with no history of allergic reaction (food, medication, and/or environment e.g., bee sting); 15 minutes
   - Patients/LHC with **history of allergic reaction** (food, medication, and/or environment e.g., bee sting) 30 minutes

   **Third or subsequent doses**:
   - Patients/LHC with no history of adverse reaction to previous doses, observe for 5 -10 minutes or as required.
7. Advise patient/LHC to contact Durham Public Health Department if they experience an adverse reaction after leaving/discharge.

## For LH admitted patients:

1. Ensure there are no contraindications to the patient receiving the COVID-19 mRNA vaccine

2. Obtain consent and document in the electronic health record.
   - Follow *Consent for Treatment policy and procedure*

3. Enter the order for the vaccine using the order mode 'per medical directive' in the electronic health record.

4. Enter a consult order for the Mobile Vaccine Team (MVT) in the electronic health record.

5. A member of the MVT or other qualified RHCP/UCP will administer the Moderna Spikevax COVID-19 mRNA vaccine:
   **First and second dose:** administer Moderna Spikevax 100 mcg (0.5 mL) IM (deltoid)
   **Third and subsequent dose(s):**
   - Patients 30 years of age to 69 years of age or those 18 years of age to 30 years of age that preferred Moderna and are **NOT** identified as moderately or severely immune compromised give, Moderna Spikevax 50mcg (0.25ml) IM (deltoid)
   - Patients 70 years of age (turning 70 years of age this calendar year) and older or patients 30to 69 years of age, or those 18 years of age to 30 years of age that preferred Moderna, identified as moderately to severely immune compromised according to MOH guidelines give: Moderna Spikevax 100mcg (0.5ml) IM (deltoid)

6. Post Vaccine recovery
   **First and second dose:**
   - Patients with no history of allergic reaction (food, medication, and/or environment e.g., bee sting); 15 minutes
   - Patients with **history of allergic reaction** (food, medication, and/or environment e.g., bee sting) 30 minutes

   **Third or subsequent doses**:
   - Patients with no history of adverse reaction to previous doses, observe for 5 -10 minutes or as required
   - Instruct the patient to report any significant side effects (i.e., new symptoms or worsening changes in existing symptoms).

7. The MVT or RHCP will report adverse reactions to the most-responsible-physician (MRP).

8. If the vaccine is being administered prior to discharge, advise the patient to contact Durham Public Health Department if they experience an adverse reaction after leaving/discharge.

## Indications to the Implementation of the Directive

Any, LH admitted patient, patient in the CIC or LHC, 30 years of age and older, eligible to receive a Moderna mRNA COVID-19 vaccine or 18 to 29 years of age who prefers the Moderna MRNA COVID-19 vaccine. Eligibility is based on current Ministry of Health guidelines.

## Precautions with the following populations:

- Patients with a history of allergic reaction to a vaccine or medication by injection (e.g. IV, IM) needing medical care.
- Patients who have a bleeding disorder or are taking blood thinning medication.
- Patients who feel faint or have fainted after receiving a vaccine or a medical procedure.

- Patients with a documented or suspected allergy to polythethylene glycol, tromethamine or polysorbate. These patients should provide proof of consult with their allergist/immunologist prior to vaccination.

## Contraindications to the Implementation of the Directive

This medical directive must not be implemented in the following circumstances:

- LH admitted patient, LHC, CIC patient, and/or their Substitute Decision Maker (SDM) and/or guardian refuses to provide verbal consent
- Patient/LHC has been diagnosed with myocarditis or pericarditis following a dose of an mRNA COVID-19 vaccine.
    - Patient/LHC is less than 18 years or age. Note: Moderna is authorized for use in adults 18 - 29, however should only be administered if the patient refuses Pfizer, as the preferred vaccine for this population, and with informed consent.
- Patient is acutely ill.
- Patients with history of anaphylactic hypersensitivity to a previous dose of mRNA COVID-19 vaccine or any of its components including polyethylene glycol, tromethamine or polysorbate.
- Patients is confirmed or suspected to have SARS-CoV-2 infection, or those with symptoms of COVID-19.
- Dosing interval and eligibility is not is not in-line with Ministry of Health guidelines

## Consent

The RHCP/UCP implementing this medical directive must obtain consent.

If the patient, LHC, or Substitute Decision Maker (SDM)/guardian refuses to provide consent, do not carry out the vaccination

## Documentation Requirements

For patients of the CIC or LHC: The RHCP/UCP will document pre-screening, consent and vaccine administration in COVAX. This includes;

- Vaccine brand given
- Vaccine lot number
- Vaccine route and site
- Date and time vaccine administered
- Country vaccine administered (Canada).
- Reason for immunization and institution (applicable if eligibility is due to type/place of employment).
- Location of vaccine event (e.g. Lakeridge Health).
- Name of implementer (i.e., who administered the vaccine).

For LH admitted patients:

- The RHCP/UCP will document all of the above in the COVAax system as well as the patient's electronic health record including any adverse reactions or adverse events.

For OH practitioners:

- Document all of the above in Parklane for LHC vaccination records.

## Review/Evaluation Process

This medical directive will be reviewed every 2 years by Occupational Health.
