Re: Fall CME 2018

Fall CME will be starting September 4th, 2018 and will run through into December 2018. Please ensure that you are scheduled with your primary service (within CEPCP catchment area) to attend one of the dates in your area. Please remember your attendance and successful completion of CME is a requirement of your annual maintenance of certification.

The CME day will start as it always does, with a medical directives quiz. You will have the ability to reference your hard copy pocketbook (but not your neighbor's and not an electronic version). You will again have 45 minutes to complete the quiz and enter it electronically through the clicker. Just like on a call, you need to watch your time. If you have concerns over test writing and the time constraint, please call us in advance of your CME day to discuss available options. In the unlikely event of a mark less than 70% on the quiz, you will be required to rewrite the quiz **before** the end of the day.

After the quiz is completed, the CME day will touch on the changes to the current ALS PCS regarding Analgesia and Combative patients; a CQI presentation on a recent high acuity call; 2 skill stations; 2 scenarios and 2 self-directed stations.

We have created a course on our new LMS system (MedicLearn) where you can review resources for this CME and practice the sample quizzes. You will find this course under "Available Courses" or "CME Content" and you may enrol yourself by clicking the blue enrol button (below is an image of the course and the enrollment page).

Please remember to bring your own stethoscope (if you have one) for use during the day. As always, your attendance and successful completion of all components of the CME are a requirement of your maintenance of certification / authorization with the CEPCP and is an expectation of your patients.

Please watch your inbox for a formal notification of the go live date for your service for the implementation of the ALS PCS changes delivered in CME.

Please contact our office should you have additional questions or concerns
