Re: Fall CME 2016

---

Fall CME will be starting after Labour Day, Tuesday September 6, 2016 and will run through into January 2017. Please ensure that you are scheduled with your primary service to attend one of the dates in your area.

The CME day will start as it always does, with a medical directives quiz. You will have the ability to reference your hard copy pocketbook (but not your neighbor's and not an electronic version). You will again have 45 minutes to complete the quiz and enter it electronically through the clicker. Just like on a call, you need to watch your time. If you have concerns over test writing and the time constraint, please call us in advance of your CME day to discuss available options. In the unlikely event of a mark less than 70% on the quiz, you will be required to rewrite the quiz before the end of the day.

Please visit our [Current CME](#) page of our website as we have posted sample quizzes and resources, including our past Self Study on ETCO<sub>2</sub>. You may also practice on previously posted medical directive quiz questions, which can be found under the past CME tab.

Please remember to bring your own stethoscope (if you have one) for use during the day. As always, your attendance and successful completion of all components of the CME are a requirement of your maintenance of certification / authorization with the CEPCP and is an expectation of your patients.

Please contact our office should you have additional questions or concerns.
